

May highlights Drinking Water Week, and few things are more fundamental than clean, quality water.

Well Water

- Common contaminants including hardness & minerals, sulphur, sediment & bacteria
- Man-made impurities like pesticides, medications & especially forever chemicals (PFAs) that come from non-stick or water & stain-resistant products, paints, polishes & manufacturing
- Majority of concerns are the taste, odor, smell & deterioration of pipes & appliances

Municipal Water

- Common contaminants including chlorine, lead, disinfectant products
- Man-made impurities like pesticides, medications & especially forever chemicals (PFAs) that come from non-stick or water & stain-resistant products, paints, polishes & manufacturing
- Majority of concerns are the taste, odor, smell & quality of the water

- **We offer various types of the most efficient Drinking Water systems that reduce the most contaminants & bring you hot, sparkling or mineralized water features**
- **Save time and avoid hassle with our Bottled Water Delivery Service**
